English- Self-Study

Grade 6

Date: 04.03.2026 **Duration: 70 minutes**

Session: 5 & 6

The Jobs AI Can (and Can't) Do

Pre-reading Questions

1. What is Artificial Intelligence (AI)? Can you name an example of AI?
2. Do you think AI will take over people's jobs? Why or why not?
3. Which jobs do you think are easy for robots or computers to do? Which are difficult?

Artificial Intelligence, or **AI**, is quickly becoming a part of everyday life. You may not see a robot walking down the street, but AI is already working behind the scenes in your phone, your car, your favourite apps and even in your home. In some countries, like Japan, robots are already working in hospitality jobs like serving food and welcoming people. But what kind of jobs can AI actually do?

AI is very good at jobs that need speed, accuracy and a lot of data. For example, in banking, AI can help to check thousands of transactions in seconds. It can spot mistakes quickly and easily or even catch people trying to commit fraud. Similarly, in medicine, AI can help doctors find problems in X-rays and scans faster than humans can. And in customer service, AI chatbots can answer simple questions all day and all night without getting tired.

Many factories already use AI-powered robots. These robots don't need breaks, and they can do the same task perfectly again and again. For example, in car manufacturing, robots put parts together much faster than humans. In supermarkets, AI systems can help manage stock and even suggest what products to buy next.

Another big area where AI is used is in transport. Self-driving cars and delivery drones use AI to understand traffic, weather and obstacles. Although they still need human supervision, AI helps make travel safer and more efficient despite the few accidents reported.

But can AI do creative jobs? Some people say yes. AI can now create art, write short stories and even compose music. It uses patterns from thousands of human-made examples to produce something new. However, many believe that AI still lacks the human touch — the emotion, experience and imagination that people bring to creative work that makes us react to songs, books and movies. Some people also say that they don't want AI to perform creative tasks for them: rather, they want AI to do the boring jobs like cleaning the house and washing dishes so that they have time to focus on being creative themselves.

There are also jobs that AI cannot do well — at least not yet. Jobs that require empathy, human connection or complex decision-making — like teaching, counselling or social work — are still best done by people. These roles need emotional intelligence, which is hard for machines to copy, but that doesn't mean it can't happen at all. In fact, this is exactly where research into programming in AI is currently focused.

In the future, AI will probably keep changing how we work. Some jobs will disappear, but new ones will appear too, like AI trainers, robot engineers and ethics officers who make sure AI is used fairly.

So, what kind of jobs can AI do? The answer is many, but not all. AI is a powerful tool, but it still needs people to guide, control and add the human spark to make it work the way we think it should.

Activity 1

Choose the best short description of this article:

A AI is dangerous and will take over every job.

B AI can only do simple jobs like cleaning and cooking.

C AI is better at art and music than humans.

D AI is helping with many jobs, but some work still needs people.

Activity 2

1. What is one reason AI is useful in banking?

2. Why are AI-powered robots used in factories?

3. According to the article, how does AI help in transportation?

4. What does the text say about AI and creativity?

5. Which jobs are still better for humans? Give two examples and explain why.

6. **True or False:** AI can already work without any human supervision. Give a reason for your answer.

7. Find a synonym in the text for 'check' (Paragraph 2).

8. Do you think the author believes AI is dangerous? Why or why not?

Task 2: Let's work out some grammar exercises!

Activity Sheet

Do and Does

Remember: To make negative sentences and questions in the Present Simple, we need an auxiliary verb 'do' or 'does'.

+ Affirmative Statement			
I	work.	He	works.
You			
They		She	
We		It	

+ Negative Statement					
I	do not or don't	work.	He	does not or doesn't	work.
You					
They			She		
We			It		

? Question					
Do	I	work?	Does	he	work?
	you				
	they			she	
	we				

Activity 1
Fill in the blanks as in the example.

Long Form	Short Form
He **does not** wake up early.	He **doesn't** wake up early.
1. I _____ like sweets.	I _____ like sweets.
2. She _____ go to school in summer.	She _____ go to school in summer.
3. We _____ have a dog.	We _____ have a dog.
4. Victoria _____ drink milk.	Victoria _____ drink milk.
5. You _____ drive.	You _____ drive.

Activity 2
Fill in the blanks: **do** or **does**, **don't** or **doesn't**?

1. When _____ Anna wake up? She _____ wake up early.
2. _____ Clause live in Hamburg? No, he _____ . He lives in Munich.
3. _____ you do any sport? Yes, I _____. I play badminton.
4. Where _____ Greg usually go for his summer holidays?
5. _____ they speak Hungarian? No, they _____ .

You did a good job with the lesson! Have a good day! Check your answers now and do self-marking. 😊

Note: You have been assigned a book for this week. Please read the book to collect your weekly 5 stars. 😊
